

# NIKITA SHAM GURAV

AI Data Science Analyst | Machine Learning · AI Agents · Full-Stack Data Apps

Navi Mumbai, India | [nikitagurav102@gmail.com](mailto:nikitagurav102@gmail.com) | [linkedin.com/in/nikita-gurav-a7b7732b9](https://linkedin.com/in/nikita-gurav-a7b7732b9) | [github.com/Nikita3909](https://github.com/Nikita3909)

**Portfolio:** [nikita3909.github.io](https://nikita3909.github.io) — 8 live demos (AI agent, full-stack CRM, dashboards) and open-source ML projects

## SUMMARY

AI Data Science Analyst with an **MSc in Data Science (CGPA 9.61)** and **1.5+ years** of professional experience building software end to end — LLM agents with RAG and tool calling, full-stack apps in React, TypeScript and Node.js, machine-learning forecasting and churn models, and automated data pipelines. Built **36 internal tools** used daily by Sales, Finance, Production and management across 6 departments, and cut manual reporting effort by **80%**. Looking to bring this to an IT or product company.

## TECHNICAL SKILLS

|                    |                                                                                                                                                                                                |
|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| AI & ML            | Python, Pandas, NumPy, scikit-learn, statsmodels, forecasting, classification, model validation (backtesting, leakage tests), LangGraph agents, RAG & embeddings, LLM APIs, prompt engineering |
| Software           | TypeScript, JavaScript, React, Node.js / Express, FastAPI, REST APIs, Tailwind CSS, Three.js, Vitest, Git & GitHub                                                                             |
| Data & BI          | SQL, PostgreSQL, SQLite, MongoDB, Power BI (DAX, data modelling), Tableau, Looker Studio, Advanced Excel, EDA, statistical analysis                                                            |
| Automation & Cloud | Google Apps Script, Google Sheets API, n8n, webhooks, Render, GitHub Pages                                                                                                                     |

## PROFESSIONAL EXPERIENCE

**AI Data Science Analyst** — BioPapro Pvt. Ltd. Sep 2025 – Present

- Built a **Procurement AI Agent** (React, TypeScript, Node.js): a **LangGraph** tool-calling agent with local **RAG** search and a procurement knowledge graph, plus modules for planning, import POs, payments, landed cost and QC; covered by 8 **Vitest** test suites.
- Built a **full-stack Sales CRM** (React, Node.js / Express, Google OAuth): 24 pages and 3 user roles covering orders, dispatch, reorder-risk prediction, WhatsApp inbox and an AI lead generator.
- Built the **CEO Command Center** (Node.js / Express on Render) reading 8 Google Sheets via API: department health scoring, attention ranking, alerts and drill-downs for stock, receivables, orders, pipeline and margin.
- Automated recurring MIS reports and workflows with Google Apps Script and AI tools, **reducing manual reporting effort by 80%**; shipped **36 internal tools** across 6 departments.
- Built **n8n AI agents**: a 163-node marketing automation (AI plans, writes, designs and publishes posts to LinkedIn, Instagram, Facebook and WhatsApp) and a WhatsApp lead-qualification agent that handles voice and images, updates the CRM and books meetings.
- Built Python analytics on PostgreSQL — Holt-Winters sales forecasting, RFM customer segmentation and an AI sales assistant — plus a Tally-vs-dispatch reconciliation tool and an automated Tally → Google Sheets finance sync.
- Gathered requirements with Sales, Operations, Finance and HR (BRD/FRD) and performed root-cause analysis on operational issues.

**Junior Data & Business Analyst (Contract)** — Calyx Chemicals & Pharmaceuticals Jan 2025 – Jun 2025

- Designed MIS and BI reports and KPI dashboards for daily and weekly tracking across Sales, Marketing and Operations.
- Cleaned, validated and consolidated multi-source data to improve reporting accuracy; supported planning and forecasting with trend analysis.

**Data Analyst Intern** — Quantum Learnings

Aug 2024 – Dec 2024

- Power BI KPI dashboards, SQL queries, data cleaning and ad-hoc analysis.

**Data Analyst Intern** — Y. D. Patil Software Dev. Cell, Pune

Jan 2024 – Apr 2024

- Power BI, Tableau and Excel dashboards; Python / Pandas EDA.

SELECTED PROJECTS

Demand Forecasting: 7 Models Compared

[github.com/Nikita3909/ml-demand-forecasting](https://github.com/Nikita3909/ml-demand-forecasting)

Python · scikit-learn · statsmodels · Pandas

- Compared naive baselines, Holt-Winters, ridge, random forest and gradient boosting on an 8-week rolling-origin backtest (4 folds); random forest reached **12.0% WAPE, 17.5% lower error** than the seasonal baseline. Leakage-safe lag features with automated tests. (synthetic data)

B2B Customer Churn Prediction + RFM

[github.com/Nikita3909/ml-customer-churn](https://github.com/Nikita3909/ml-customer-churn)

Python · scikit-learn · Pandas

- Time-split churn model on monthly snapshots: calling the riskiest 20% reaches **91% of churners** (rule of thumb: 80%), PR-AUC 0.91; showed that RFM's "At Risk" label alone can mislead. (synthetic data)

Live demos of production systems

[nikita3909.github.io](https://nikita3909.github.io)

- Clickable demos (fictional data) of the Procurement AI Agent, Sales CRM, CEO Command Center, Export Lead Tracker, 3D Packaging Design Studio (Three.js), Tally Sync and n8n AI workflows.

EDUCATION

MSc in Data Science — University of Pune

2025 | CGPA 9.61 / 10

BSc in Mathematics — University of Mumbai

2023 | CGPA 8.50 / 10

CERTIFICATIONS & ACHIEVEMENTS

- Gold Certificate** — Data Science & Analytics, FutureSkills Prime, Government of India
- Python for Data Science & Machine Learning — Udemy · Advanced Excel — Quantum Learnings
- Lila Poonawala Foundation Scholarship** — Academic Excellence Award
